UNITED STATES AIR FORCE AUXILIARY  
MAXWELL AIR FORCE BASE, ALABAMA 36112-6332

2 February 2006

MEMORANDUM FOR ALL CAP REGION AND WING COMMANDERS

FROM: CC

SUBJECT: CAP Corporate Aircraft Decals

1. The November 2001 NEC voted to replace the current 8 and 11-inch corporate aircraft seal with a 6-inch lettered USAF AUX decal. In addition to the USAF AUX decal the NEC also approved installation of a 12-inch CAP emblem for each aircraft door.
2. The USAF AUX decal is available in two colors, white and blue. White decals are for aircraft that have the current CAP paint scheme or any other color that contrasts with white. Blue decals will be used on aircraft with paint colors that contrast with blue.
3. Install the USAF AUX decal at the mid point of the vertical stabilizer. The top edge of the decal should be placed flush with the trailing edge of the vertical stabilizer leading edge panel. The corporate seal can be removed with a heat gun without damaging the paint. Install the CAP emblem on each door centered vertically and horizontally. See attached example.
4. All exterior decals are available upon request from NHQ CAP/LGM. Regions/wings should determine the color of the USAF AUX decals required and fax their request to NHQ CAP/LGM at 334-953-1668.
5. Point of contact at National Headquarters is LGM at 334-953-6032.
6. This letter supersedes NHQ CAP/LGM letter, 20 Mar 02, same subject.

ANTONIO J. PINEDA  
Major General  
National Commander

Attachment: Decal Placement Examples

For planes with tail color other than red, the letters can be in dark blue or white.

\*If any of these instructions are not clear or if the unit encounters problems while installing these decals, please call NHQ CAP/LGM 334-953-6032 or 5427 before permanently installing decals.
